

“Whiskey” (Pat.Pend) Broadband NVIS Antenna

The Whiskey, or “W” antenna is designed as a regional to continental coverage antenna intended for near and mid-range (0-2500Miles) Omni-directional HF communications in environmental disasters and military tactical scenarios. Its strong NVIS (Near Vertical Incidence Skywave) capabilities allow for communications over mountainous terrain and its full 2-30 Mhz spectrum broadband coverage makes it an excellent antenna for ALE operations without the need for a tuner/coupler reducing costs. No radial ground plane or grounding is required making the antenna ideal for ground or rooftop installations, ground to ground – air - ship. The “Whiskey” antenna can be purchased in tactical or permanent models. Masts are also available.

Antenna	Specifications
Frequency	2-30 Mhz Broadband
Power (to 5kw Avail.)	1kw CW 4kw PEP
Impedance	50 Ohms
Polarization	Horizontal
VSWR	1.8: 1 Max
Pattern	Omni-Directional
Weight	41 lbs with stakes
